EXP 12: Change Hardware compatibility of a VM (Either by clone/create new one) which is already created and configured.

AIM:

To Change Hardware compatibility of a VM (Either by clone/create new one) which is already created and configured.

PROCEDURE:

STEP 1: In VMware Workstation, click on your VM from the left panel.

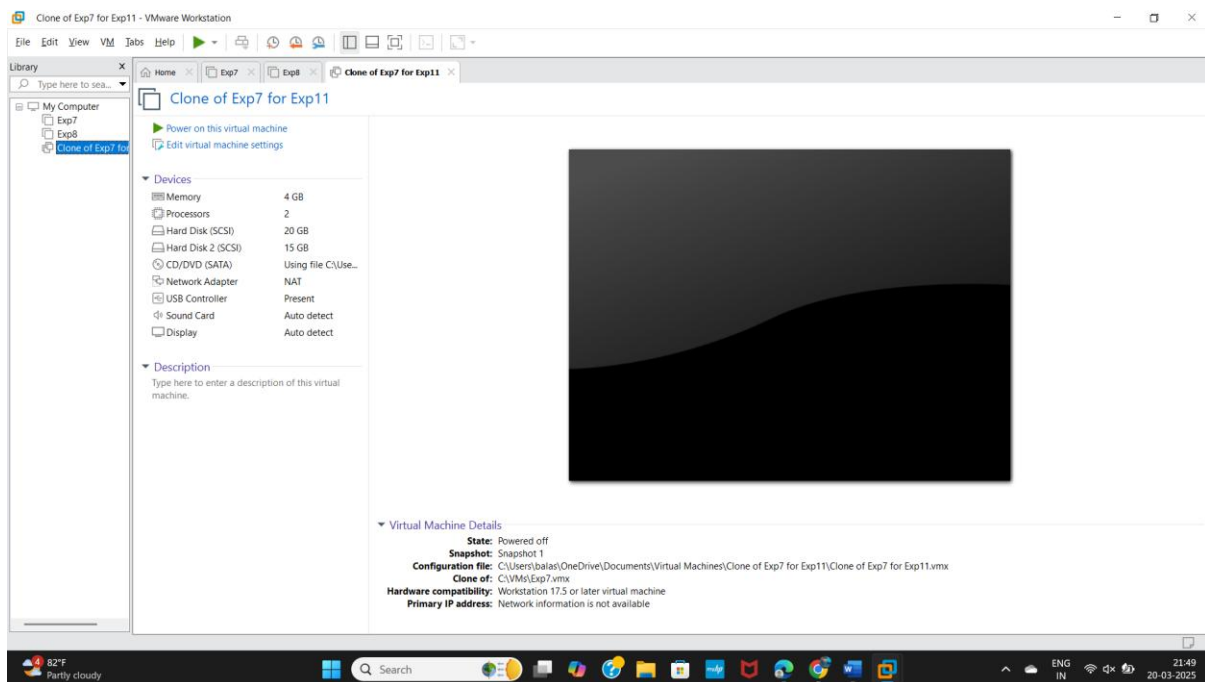

STEP 2: Click "VM" → "Manage" → "Change Hardware Compatibility".

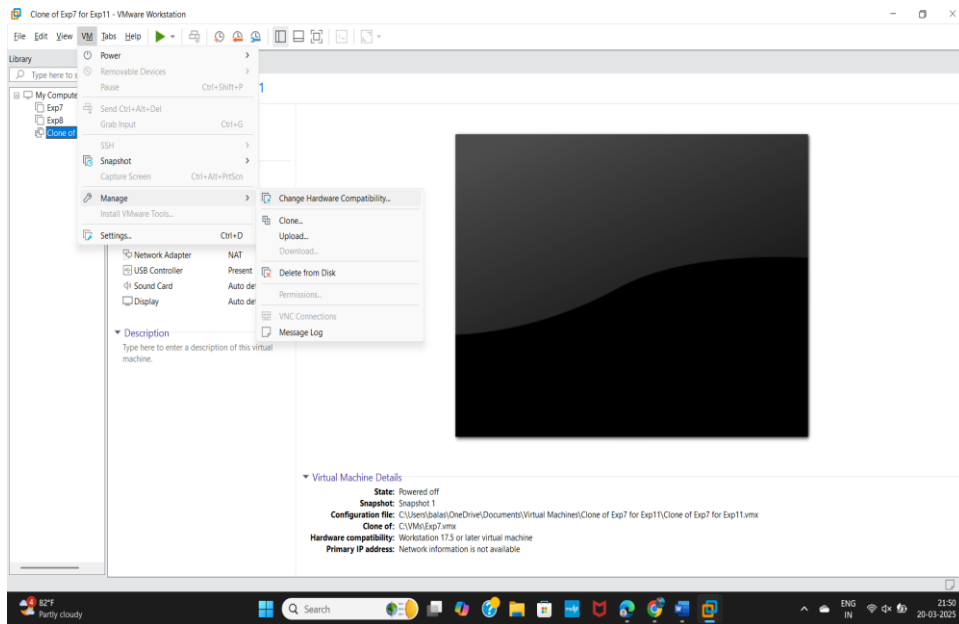

STEP 3: A Hardware Compatibility Wizard will open.

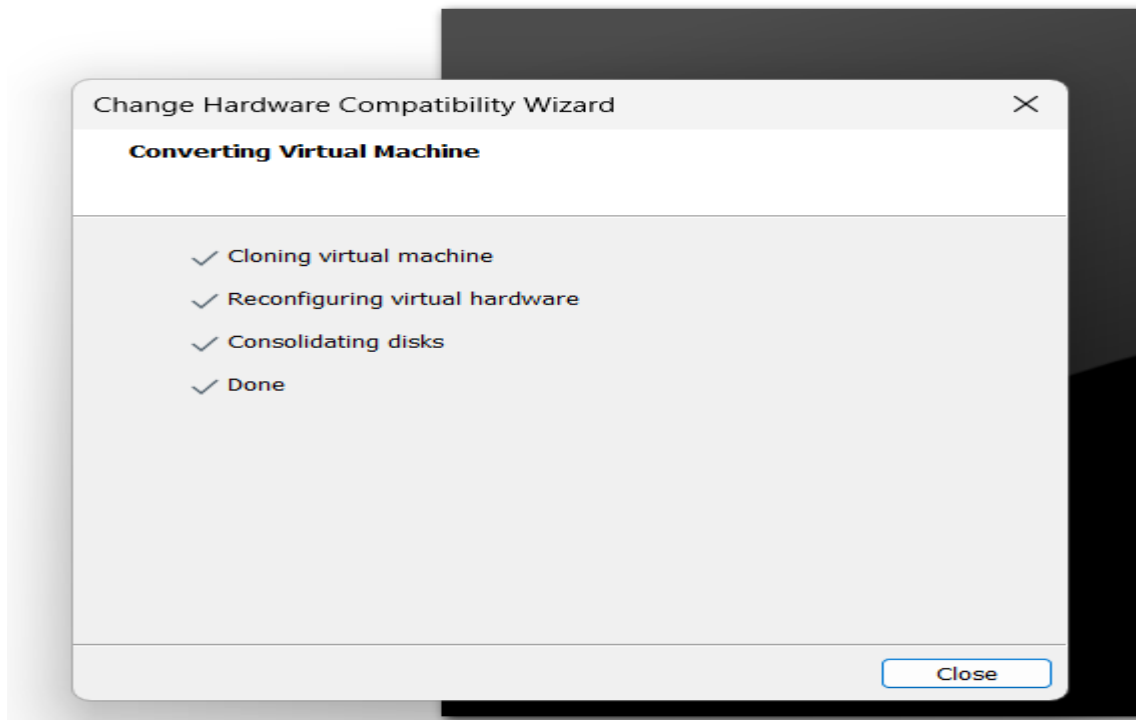

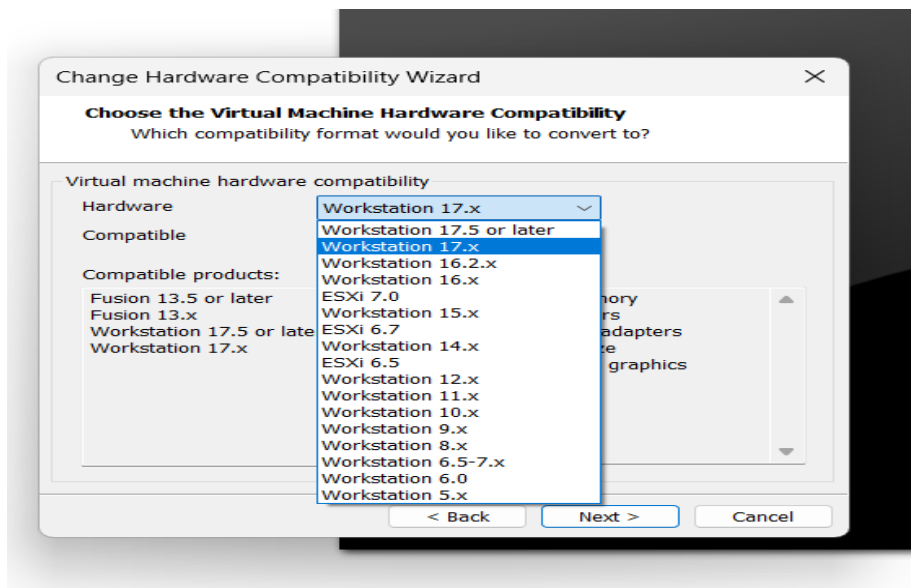

STEP 4: Choose the snapshot to clone from it or select clone type and click next. Choose the VMware Workstation version for compatibility. Click Next.

STEP 5: Modify RAM, CPU, storage, and other hardware settings. Click Finish.

IMPLEMENTATION:

RESULT:

Hardware compatibility of a VM (Either by clone/create new one) which is already created and configured has been changed successfully.
