EXP 11: Create a Cloning of a VM and Test it by loading the Previous Version/Cloned VM AIM:

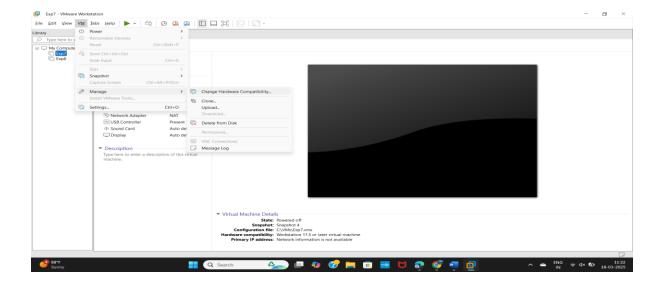

To create a cloning of a vm and test it by loading the previous version/cloned vm.

PROCEDURE:

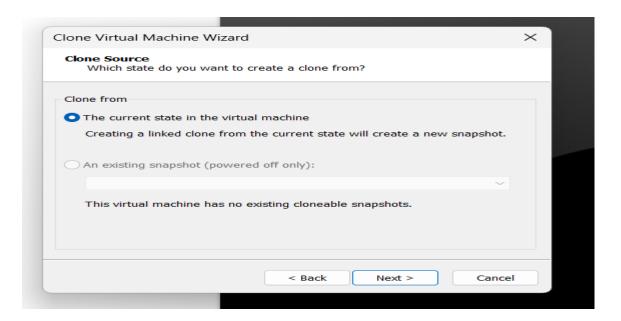

- STEP 1: Download VMware Workstation, Complete the installation and launch VMware Workstation.
- STEP 2: In VMware Workstation, click on your VM from the left panel. Ensure the VM you want to clone is powered off.
- STEP 3: Click "VM" from the top menu, Select "Manage" → "Clone". The **Clone Virtual Machine Wizard** will appear.
- STEP 4: Choose the snapshot to clone from it or select clone type and click next.
- STEP 5: Enter a Name for the Clone, Choose a Storage Location for the clone. Click Finish to create the clone.
- STEP 6: Go to VMware Workstation and select the cloned VM.Click Power On to start the cloned VM. Check the working of it.
- STEP 7: If needed go to VM ->Snapshot -> Snapshot manager and select previous snapshot then click restore and yes to confirm.
- STEP 8: VM is cloned and verified.

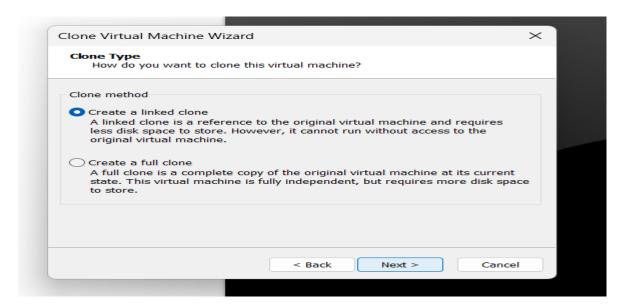

IMPLEMENTATION:

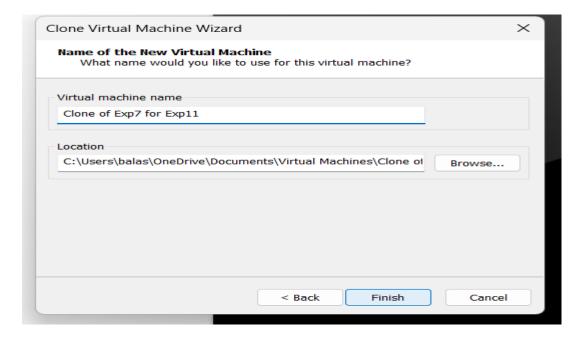

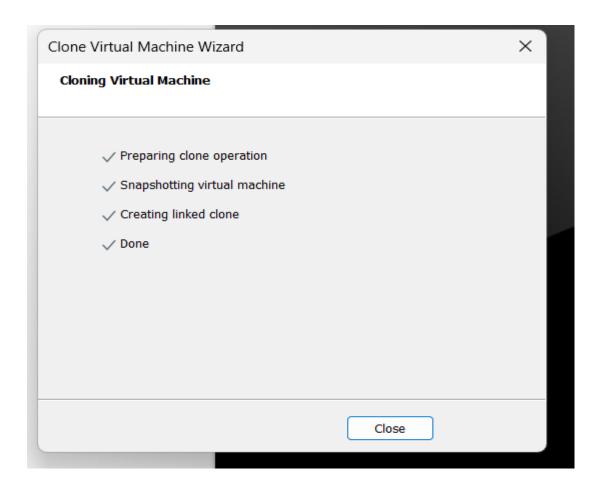

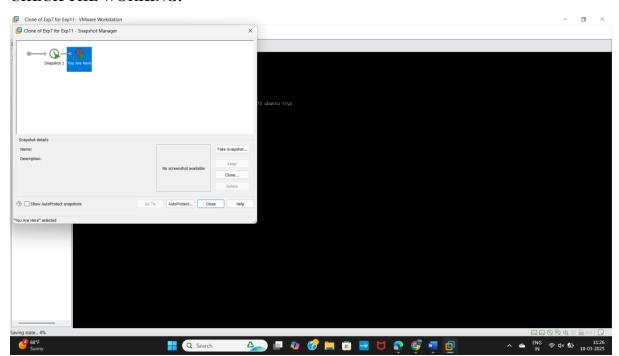

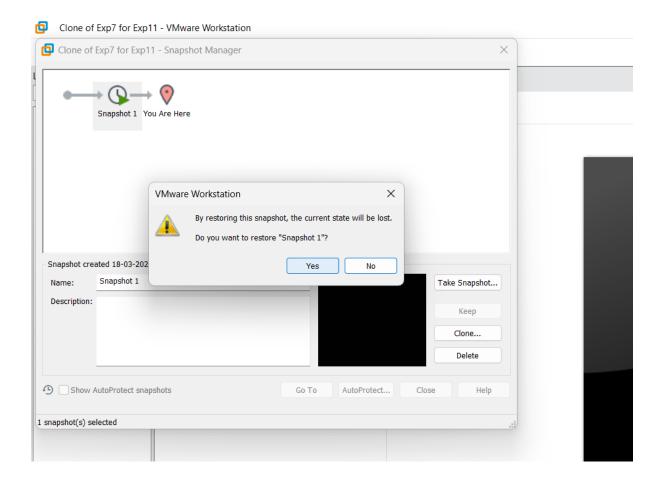

CHECK THE WORKING:

RESULT:

Cloning of a vm is created and tested by loading the previous version/cloned vm successfully.
